Dear Madam,

**RE: WOODLAWN EL6493 SULPHIDE MINERALISATION DISCOVERY**

The Directors of Tri Origin Minerals Ltd (“TRO”) are pleased to announce that the first drill hole of a two hole programme (~600 m) has intersected a significant width of pyrite rich sulphide mineralisation.

The mineralisation is a new discovery approximately 5 km northwest of the Woodlawn deposit. It is within a belt of prospective Silurian rocks controlled by TRO and extending for approximately 60 km. This hole intersected mineralisation located within a targeted coincident electromagnetic and geochemical anomaly. Geological inspection indicates the mineralisation is of skarn-replacement style and hosted in limestone. The location of this hole and the geological setting is outlined in the 12 April release.

Disseminated to locally massive pyrite +/-sphalerite, galena and chalcopyrite mineralisation was intersected from 208-215.8 m (7.8 m down hole thickness). No information is available at this stage on the orientation of the mineralisation.

Details of the drill hole are:

Drill hole No: WLT001  
Total Depth: 280.8 m  
Location: 6119450mN(AMG) 729650mE(AMG)  
Inclination: -60 degrees  
Azimuth: 214 degrees magnetic

The core is being prepared for assay. The Company will further report on these results when the assays have been received.

In accordance with the Australian Stock Exchange Limited Listing Rules Appendix 5A, the information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr David Hobby, an employee of the Company, who is a Member of The Australasian Institute of Mining and Metallurgy.

Mr Hobby has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activities which he is undertaking to qualify as a Competent Persons as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Hobby consents to the inclusion in the report of the matters in the form and context in which they appear based on information derived from his technical work.

For further information, contact Bruce Robertson on (02) 9221 4322.

Yours faithfully,

**Bruce Robertson**  
Managing Director
