Dear Madam,

### **WOODLAWN ZINC COPPER PROJECTS**

Tri Origin Minerals Ltd (Tri Origin) is pleased to announce that it has appointed key consultants to advance both the bankable feasibility study and statutory approval process for the Woodlawn Zinc Copper Projects (Woodlawn Underground and Woodlawn Retreatment Projects).

The bankable feasibility study is on schedule for completion in first quarter 2008.

The Woodlawn Underground Project component of the study is evaluating the opportunity to mine and treat around 440,000 tonnes per annum of ore. The Woodlawn Retreatment Project will be evaluated as part of the bankable feasibility study on an integrated basis to treat up to 10 Mt of tailings. The combined projects would produce in the order of 120,000 tonnes per annum of concentrate.

The Company has appointed Internet Engineering Pty Ltd (Internet) to act as the overall managing contractor (study manager), with all other activity areas reporting into the Internet study process. Tri Origin will manage specialist areas, which will also feed into the Internet final report.

Internet is an experienced mineral project study management group and in the past has managed a number of feasibility studies and plant construction developments similar to Tri Origin's projects.

Tri Origin has appointed Parsons Brinckerhoff as manager for the Part 3A Environmental Planning & Assessment programme.

Parsons Brinckerhoff is highly experienced in assisting clients to address community and environmental issues, and provides environmental and other services to some of the world's largest mining, petrochemical, power and manufacturing companies.

For further information, contact Bruce Robertson on (02) 9221 4322.

Yours faithfully,

**Bruce Robertson**  
**Managing Director**
